

September 18<sup>th</sup>, 2009

Dear Valued Customer:

Hopefully this letter finds you well and the future outlook on your business is showing signs of improvement. We here at Southtech have seen an uptick in order and quoting activity over the past several weeks and are optimistic for the coming months. Although the outlook appears to be setting up for positive movement, we are bracing for a long recovery period.

So, as an effort to help our customers with controlling their inventories during these trying economic times, Southtech is temporarily reducing minimums for several items in our product line. Effective today, the following minimums will apply:

- 10 sheets for stock Decorative thick sheet (.060 - .180)
- 150 linear feet for roll stock decorative (.020 - .040)
- 500 lbs for custom sheet sizes (Black ABS - .060, .090, .120, and .180 thicknesses)
- 1,000 lbs for custom color ABS (.020 - .300)
- 2500 lbs for Solarkote and Vintex products.
- 300 linear feet or 500 lbs (whichever is greater) for Ultimate True Soft extruder laminated Vinyl

It is our sincerest hope that reducing minimums on these products will help improve your cash flow during this slow recovery period. As always, thank you for your continued business and allowing Southtech to supply your decorative and extruded sheet requirements.

Sincerely,

A handwritten signature in black ink that reads 'Chris Toler'.

Chris Toler  
Vice President of Sales and Marketing
